

To Whom It May Concern:

This letter is to confirm that the System for the Assessment of Impact & Quality of Research (SAIQoR) developed through Erasmus+ Repesea have been implemented at Universitas Islam Indonesia by several initiatives, such as:

1. The incorporation of the indicators of SAIQoR into research assessment approach at the institutional level, as indicated by the university quality objectives.
2. The introduction of new incentive schemes to appreciate the achievement of SAIQoR indicators such as number of journal papers, conference proceedings, books, and citations.
3. The provision of more budget to support the conferences within the university to disseminate research findings.
4. The improvement of institutional research road map to better align with the university vision and mission.
5. The enhancement of infrastructure through the provision better equipped laboratory for research.

In implementing the initiatives above, UII is committed to use gradual strategy in ensuring the sustainability of the project. It is considered to be contextual and realistic, without sacrificing the substantive aspects.

Yogyakarta, 25 November 2019

Rector,

Fathul Wahid

UNIVERSITAS GADJAH MADA

To Whom It May Concern

Faculty of Economics and Business Universitas Gadjah Mada continuously maintains the quality of the program as clearly stated in our mission. We actively committed to fulfill all quality assessment processes at university level (internal quality assurance – AMI [Audit Mutu Internal], national (BANPT), and international level (AACSB).

As understood that one of the outputs of the Erasmus+ CBHE action Assessing and Improving Research Performance at South East Asian Universities (REPESEA) Project is the System for Assessing Impacts and Quality of Research (SAIQoR). The SAIQoR provides a comprehensive guideline particularly on how to assess the quality of research in one institution which covers both output and outcome dimension. We are aware that the quality assessment at university, national, and international level in Indonesia is moving forward to comprehensive dimensions (including the impact of the research and its impact to society). The SAIQoR therefore is inline with the current quality assessment in our institution.

This letter is to confirm that we support the implementation of the SAIQoR at our institution.

To Whom It May Concern

IMPLEMENTATION OF THE SYSTEM OF THE ASSESSMENT OF THE IMPACT AND THE QUALITY OF THE RESEARCH (SAIQOR)

Universiti Teknologi Malaysia (UTM) is thankful to the Erasmus Capacity Building project 574092-EPP-1-2016-1-SK-EPPKA2-CBHE-JP "Assessing and Improving Research Performance at South East Asian Universities" (REPESEA) as it enables a team of researchers from both Azman Hashim International Business School and the Innovation & Commercialisation Centre of the university to deeply involved in the project.

2. Hereby, I would like to assure you that the university has been made aware of the project and its efforts in developing a new system of assessing and improving the measurement of research performance known as System of Assessment of the Impact and the Quality of the Research (SAIQoR).

3. The assessment instrument indeed expands the traditional research performance measurement and should serve as a more well-rounded impact assessment of the university's research and innovation. UTM, through its Office of Deputy Vice Chancellor (Research & Innovation), will gradually adopt some of the suggested parameters in SAIQoR in our research benchmarking at different levels. The implementation is expected to help us enhance the impact and increase the quality of the research.

Thank you.

"BERKHIDMAT UNTUK NEGARA"
